

# The Tunnel Statistics 2021

25<sup>th</sup> of November 2021

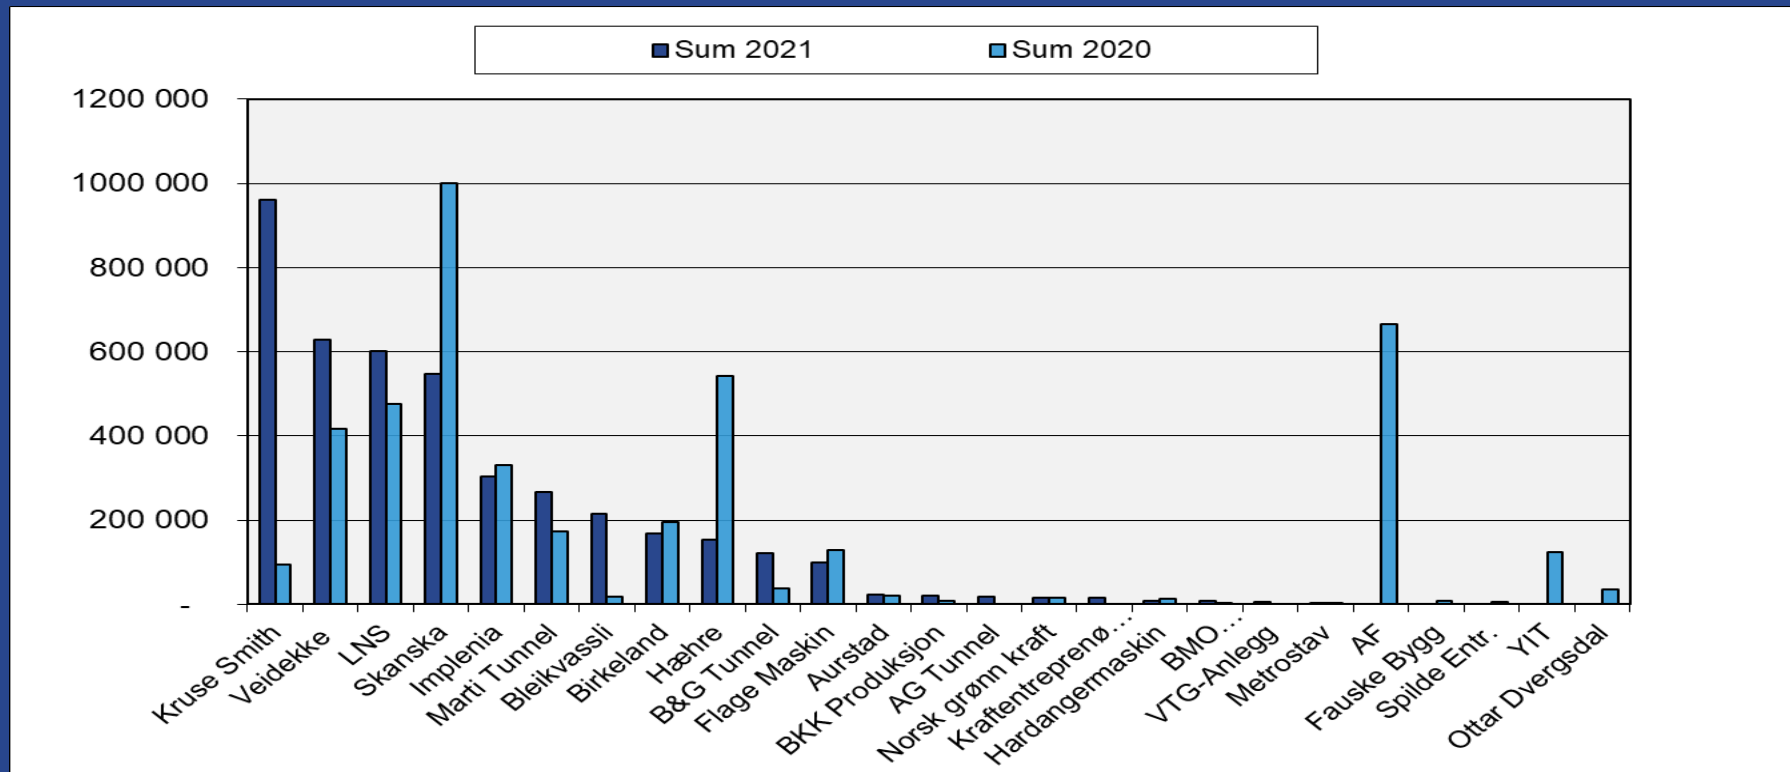

# A small volume decrease from last year, from slightly above 4,3 mill fm<sup>3</sup> in 2020 to almost 4,2 mill fm<sup>3</sup> in 2021

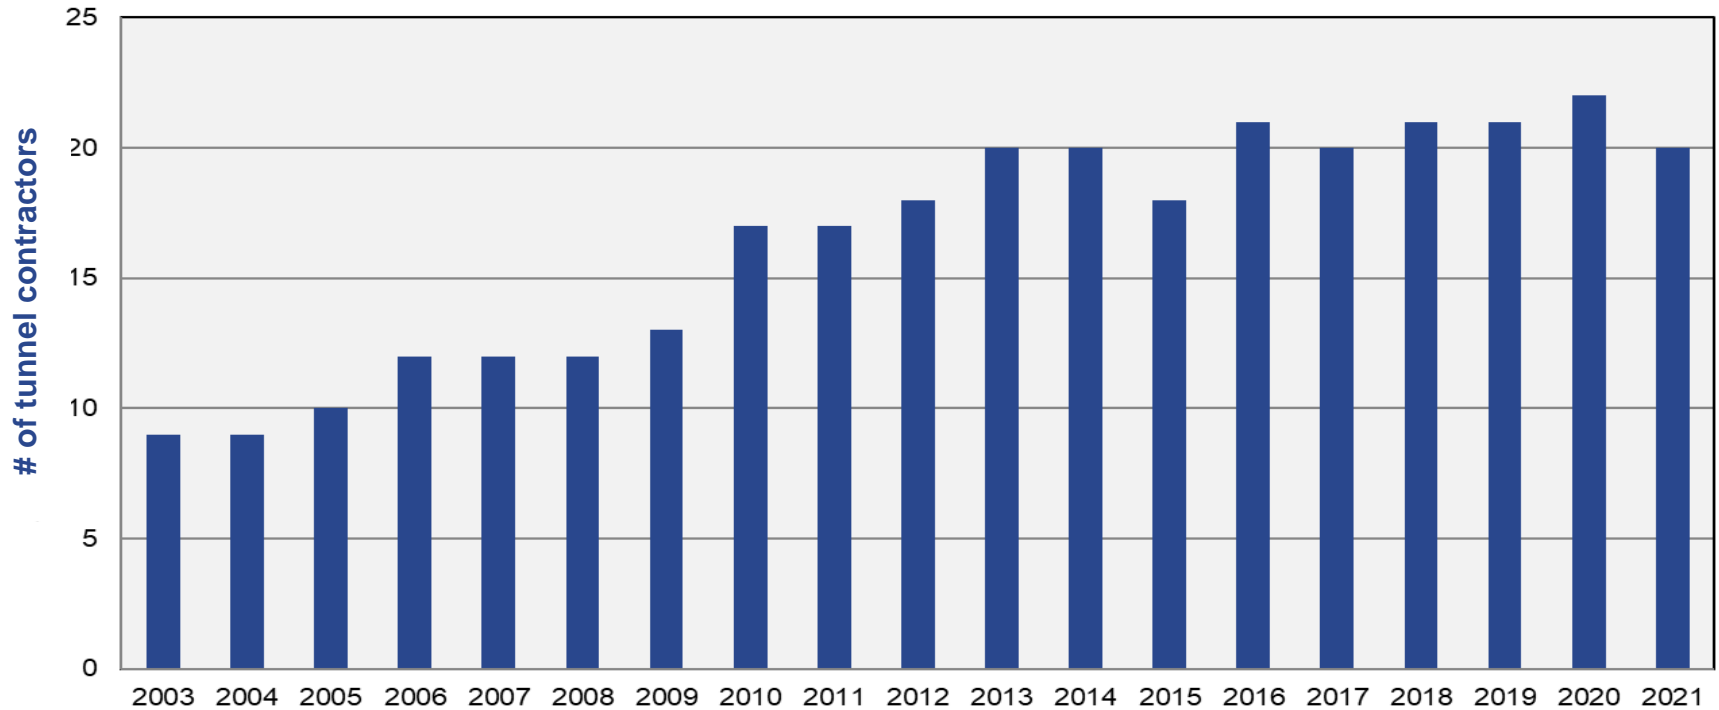

# Remarkable increase in caverns and water supply, decrease in hydropower and highways

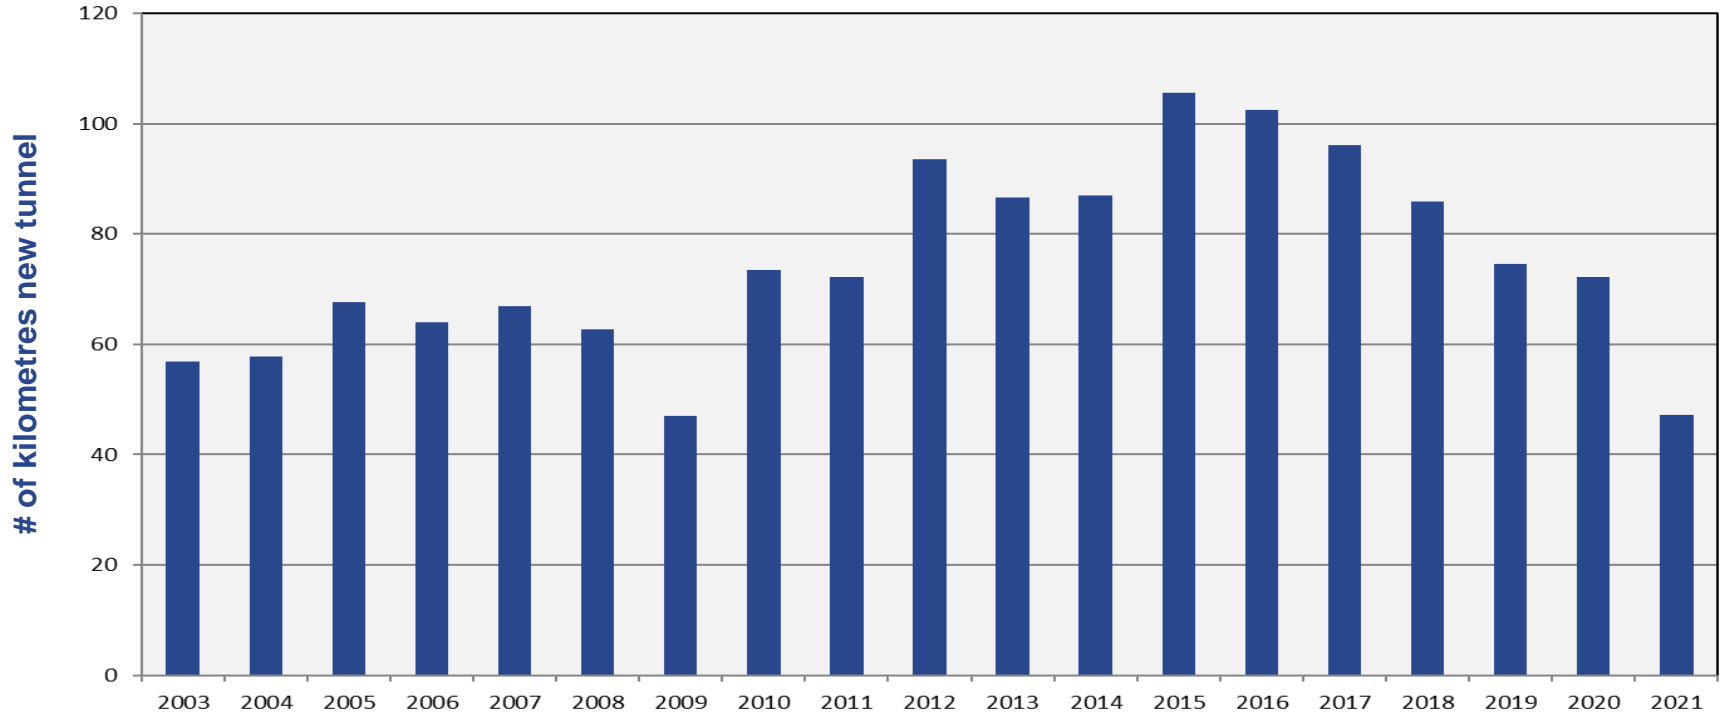

# Kruse-Smith on top, Veidekke and LNS with increase in volume, Skanska, AF and Hæhre with sharp decrease

# The number of tunnel contractors is stable, but this years contractors are a bit different than the ones from last year

# The decrease in metres new tunnel continues, is due to large storage caverns and rehabilitation of old tunnels

# Two suppliers of hydropower tunnels with small cross sections, are the only one working with TBMs in 2021
